Rebuo Growth Website Deployment Guide

1. GitHub Repository Setup

1. Visit https://github.com and log into your account.

2. Click the '+' icon at the top-right and select 'New repository'.

3. Name the repository 'rebuo-growth'.

4. Keep the repository Public. Do NOT initialize with README.

5. Click 'Create repository'.

6. On the next page, click 'Uploading an existing file' or drag and drop the extracted HTML/CSS/JS files.

7. Click 'Commit changes' at the bottom.

2. Deploy to Netlify

1. Go to https://www.netlify.com and log in or sign up.

2. Click 'Add new site' > 'Import an existing project'.

3. Choose GitHub and authorize your GitHub account.

4. Select the 'rebuo-growth' repository.

5. Use default settings (no build command, no publish directory needed).

6. Click 'Deploy site' and wait for it to finish.

7. You will get a live link like: https://rebuo-growth.netlify.app
